

## MAKING MIST COLLECTION INSTALL EASY

### Plumbing

#### Flexible Solutions with Rigid Piping

All units shipped with universal flex pipe kits. Additionally, MP Systems offers & stocks hard pipe components referenced in MP's Profitable Install Manual (found at [mp-systems.net](http://mp-systems.net))

### User Friendly Install

Easily Construct Clean, Leak Free Ducting Sections with Ability to Jog Around Fixed Interference Points

- Prevents Sagging Hoses or Unsightly Routing

Simple Tools:

- Hand Saw/Reciprocating Saw
- PVC Cement

### Electrical Kits Suitable for Most Applications

Simple Pump or Machine Mount Electrical Interfaces

Complete electrical interface kits suited for various size units in either voltage, single, or three-phase compatible

- Select kit by blower horsepower
- Contents include overload protection, motor control, and documentation

Available accessory interface board suitable for standalone, Push button or pump mount control

Patented control for most Mist Collector Units

Automatic compensation for machine cycle times to optimize mist collector performance without the need for operator input

Ensures cabinet is clear before doors opening
