

Cyclonic Debris Removal

Stop Cleaning Your Machine Tool Tank,
Start Making More Money

Learn More on
Our Website

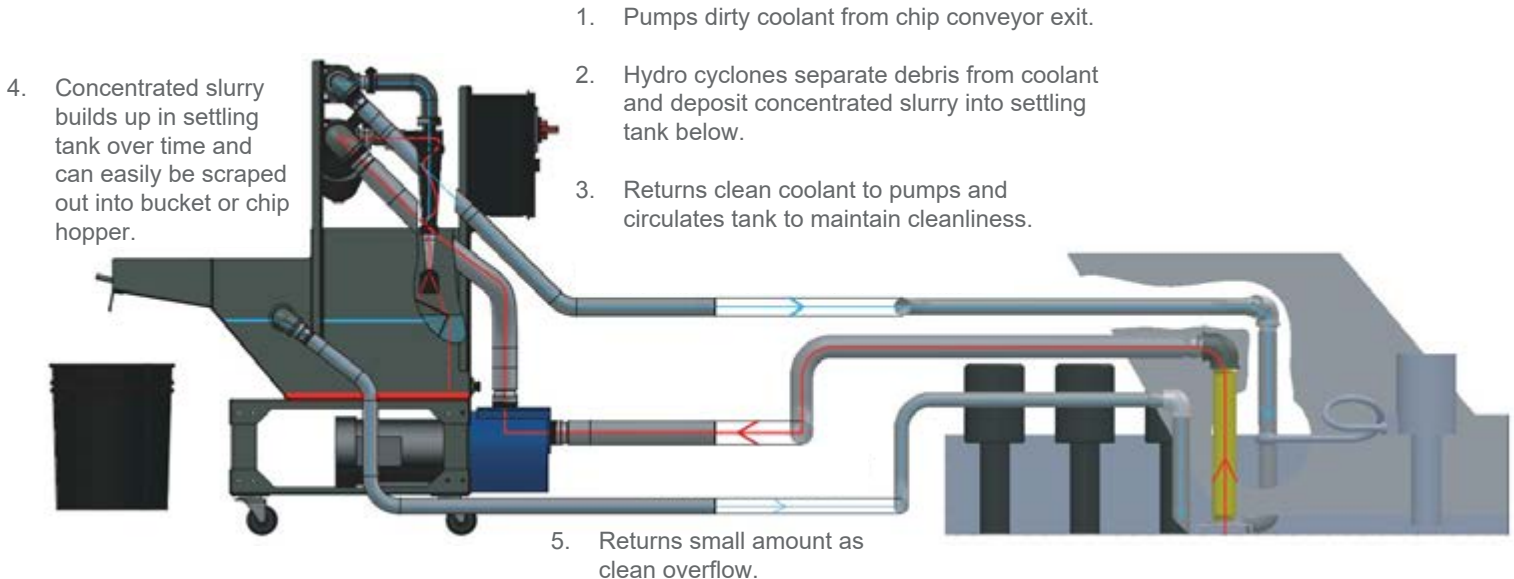

Key Features

- 80 GPM flow rate
- Filtration down to 3 μm
- Cleanable pre-filter
- No disposable filters
- Low maintenance
- 2 year parts warranty
- Ease of Install
- Dimensions:
24"W x 48"L x 48"H

Benefit

- Clean coolant lasts significantly longer
- Greatly extend tank clean outs
- Less wear & tear on machine
- Overall cleaner machining environment
- Improved part quality
- Improved tool life

How It Works:

Cyclonic Done Right!

The CDR is not like other products on the market. It is the solution to a long-existing problem. **No more normalizing frequent tank clean-outs**, stopping your machine and losing money. **Now there is a solution!**

Adding just 1 quart of debris a day to your tank may not seem like much, but it accumulates over time.

One quart of debris a day is equal to:

45 gallons of sludge in your tank over 6 months

90 gallons of sludge in your tank over 1 year

The MP Systems **CDR KIT**

Access Video and Kit Request

This kit is designed to provide an easy to follow step by step process for qualifying our CDR to ensure it will work effectively with your application.

- 841µm Mesh Sieve (make sure to never fully submerge when sifting)
- QR code for step by step video also labeled on sieve
- Measuring Cup
- ROI Calculator Zip Drive (video included)

The MP Systems **CDR PROMISE**

The CDR is the right solution for you if:

- Cutting **cast iron** or **aluminum** (creating dust).
- High volume production.
- Cleaning out coolant tanks frequently.

Qualify using our **CDR Kit**

- Filtering Conveyor w/ No remaining fines
- Drag or Magnetic Conveyor w/ No remaining fines
- Drag or Magnetic Conveyor with less than 10% remaining fines = Requires a **SEVERE DUTY UPGRADE**
